

# LIBRA EDUCATION

UNIVERSITY CONSULTANCY

## EDUCATION IN THE UK

The United Kingdom has a rich history of excellent education. Universities offer students unbeatable opportunities to learn from the best lecturers. It has been shown that graduates from British universities have a lifetime advantage over their peers who studied elsewhere.

## The Peer Effect

It may be odd to hear that students often learn more from their peers than from their teachers. The bright and inquisitive minds that fill British universities challenge and support each other every step of the way. Through making connections and friendships students develop a valuable network that lasts for the rest of their lives.

## International Students in the UK

The UK is recognised around the world for the high quality of education and it is no surprise to

hear that international students play a vital role. Over half a million international students are currently studying in the UK.

## Our Mission

At Libra Education, we aim to maximise the opportunities for young people studying in the UK by working with universities to support our students to achieve their academic potential.

Being based in the UK gives us direct access to the universities. What truly makes us special though is our consultants and tutors. Our dedicated consultants work tirelessly to ensure that our students secure a place at their dream university. Our team is made up of Oxbridge graduates and qualified teachers with first-hand experience guiding bright minds through the application process.

### Oscar Hardy

All student journeys are overseen by Eton Scholar and Cambridge University graduate Oscar Hardy. Since 2011 his expert experience has allowed him to ensure students are successful in their academic goals.

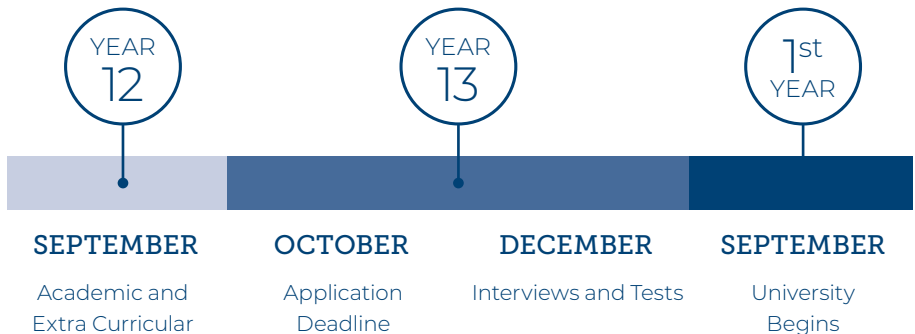

**GOOD THINGS COME  
TO THOSE WHO PLAN**

**Our Application Plan  
guarantees success  
every single time.**

The British university application process is refreshingly simple. There is one portal through which you can apply to a maximum of 5 courses. There is a great bank of resources to learn about the courses and the universities you are considering applying to.

That said, with such a simple process it can be hard to stand out. With so many applicants, the average application is only read for 30 seconds. We ensure students get noticed. The secret is to plan ahead and build experience, skills and competence over time.

## Evidence

To prove that they are the best candidate students must:

- Achieve top grades;
- Provide evidence of academic interest; and
- Show their personality.

## 1 Initial Consultation

University consultancy starts with an honest and free assessment. We learn about each student and consider which university and course they would be best suited to.

## 2 Route Planning

Students receive a report and an Academic Plan explaining how we will support them towards success. This month-by-month guide advises them on academics, work experience and essay writing preparation.

## 3 Dedicated Consultant

Our consultants are responsible for ensuring that we adapt to the changing needs of the student. They are subject area experts in the student's degree of choice.

## 4 University Visits

We organise visits and consultations with universities and provide feedback to guide students through their application. We facilitate discussions with current undergraduates to bring the student experience to life.

## 5 Assessment Preparation

University assessments comprise tests and interviews. Using our subject expertise, we develop each student's knowledge making them a 'subject area expert'.

## SUCCESS STORIES

**Our personalised Application Plans for Student deliver first-class results.**

### **Lucy**

Aiming to study medicine at the University of Cambridge, Lucy faced a tough challenge. Not only did she need to achieve the required grades, she also needed to make herself stand out in her personal statement against many other strong candidates. We provided her with the demonstrable experience to secure an interview. At the interview, Lucy used techniques taught to her during the bespoke interview coaching to gain a place.

### **Stephen**

Coming to us at age 16, Stephen was hoping to study PPE at Oxford. By starting with an assessment, we identified that he needed to improve in three areas: his academic achievement; his extra-curricular studies; and in his ability to debate topics and ideas. Through weekly mentoring, we helped Stephen to develop a specific interest within the field and create a research project capable of demonstrating his excellence.

### **Max**

Max was hoping to study Computer Science. With our support he successfully made an application to Trinity College, Cambridge. We coached him on the specifics of the application process, the interview and the admissions test.

## UNIVERSITY PLACEMENTS

We have successfully supported students with university applications all across the UK. This includes numerous Oxbridge, G5 and Russell Group universities.

### Successful Placements

Cambridge	LSE	Edinburgh
Oxford	Durham	Bristol
UCL	King's College London	Bath
Imperial	Warwick	and many more...
